Testimony

I think our registration fee can be paid when we pay our Town taxes. This way if your taxes are paid your car is registered. Or a better idea would be once our vehicle is registered that registration stays with the vehicle as long as it is owned by the same owner and does not have to be renewed. Doing this would reduce the cost of employees at the DMV and shorten the lines plus provide some relief to the taxpayers in time and money and aggravation. The citizens of Connecticut are some of the highest tax in the country it would be nice to see some relief in this area.
